

Morrisville, NC — January 26, 2012 — [SlickEdit, Inc.](#), provider of the most versatile code editors available, announces the release of SlickEdit 2011 for Mac. This new release brings SlickEdit's vast, flexible project and language support to the Mac as a native Aqua interface application.

SlickEdit is the premier cross-platform, multi-language code editor that gives programmers the ability to effectively code in over 40 languages on 9 platforms. In addition to this flexibility, this release offers Mac developers the unprecedented ability to smoothly handle large projects of over 40,000 files and to use SlickEdit's macro language to extend the editor to their personal style. This release also offers 14 strong emulations for anyone who is migrating from another editor, which will also be helpful for programmers who are new to working on a Mac.

"Our latest release of SlickEdit for Mac demonstrates the level of our dedication to improving SlickEdit. All the graphics in SlickEdit were rewritten in order to create this new version. Now Mac developers can use one full featured development tool that supports all their languages and lets them code the way they want without making any sacrifices," commented Clark Maurer, President and CEO.

Key features available in [SlickEdit for Mac](#) include:

- Extensive project support, including the ability to open, build, and debug
- Integrated debugging.
- Backup version history.
- Edit files up to 2 GB.
- 14 emulations
- Color coding support for more than 40 languages.
- Support for most major version control systems.
- Built-in file FTP tool.
- Source code navigation.
- DIFFzilla, a comprehensive multi-file comparison tool.
